Filing Date: 8/10/01; claimed foreign priority to 8/25/00

Applicant: Yamamoto et al.

Examiner: Alexander Williams

Applicant's Amendment in Paper # 4, filed 7/23/02 has been acknowledged.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Initially, and with respect to claims 1 to 4, note that a "product by process" claim is directed to the product per se, no matter how actually made, In re Hirao, 190 USPQ 15 at 17 (footnote 3). See also In re Brown, 173 USPQ 685; In re Luck, 177 USPQ 523; In re Wertheim, 191 USPQ 90 (209 USPQ 554 does not deal with this issue); In re Fitzgerald, 205 USPQ 594, 596 (CCPA); In re Marosi et al., 218 USPQ 289 (CAFC);

and most recently, In re Thorpe et al., 227 USPQ 964 (CAFC, 1985) all of which make it clear that it is the final product per se which must be determined in a "product by process" claim, and not the patentability of the process, and that, as here, an old or obvious product produced by a new method is not patentable as a product, whether claimed in "product by process" claims or not. Note that Applicant has burden of proof in such cases as the above case law makes clear.

Claims 1 to 4 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Kashiba et al. (U.S. Patent # 5,153,077).

For example, in claim 1 and similar claims 2 to 4, Kashiba et al. (**figures 1 to 14c**) specifically **figure 1** show a copper clad laminate coated with copper foils of different thickness on both sides, wherein a first copper foil **2a** on one side of said laminate is not recrystallizable by hot pressing for production of said laminate and a second foil **2b** on the other side of recrystallizable by the hot pressing and thicker than said first foil.

As to the grounds of rejection under section 103, see MPEP § 2113.

Claims 1 to 4 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Maeda et al. (U.S. Patent # 4,751,146).

For example, in claim 1 and similar claims 2 to 4, Maeda et al. (**figures 1 to 17**) specifically **figure 11** show a copper clad laminate coated with copper foils of different thickness on both sides, wherein a first copper foil **1** on one side of said laminate is not recrystallizable by hot pressing for production of said laminate and a second foil **9** on the other side of recrystallizable by the hot pressing and thicker than said first foil.

As to the grounds of rejection under section 103, see MPEP § 2113.

Response

Applicant's arguments filed 7/23/02 have been fully considered, but are moot in view of the new grounds of rejections detailed above.
